

Reflection of Vilnius visit

Pedagogical University

The study visit to Lithuania was characterized by participant at the training at SMK . It was an opportunity to do something for improvement of quality assurance at the university .

At SMK, presenters believe that anyone can be a force for change. The training and workshop was designed to give people the knowledge, skills and confidence to effect change as well as build stronger teams and organisations.

So trainers ,Alvidas Punis, Inga Petrikiene and Laura Senkeviciute were represented trainings well as always. But ,there were a few details from a practical aspects which need more clear explanation and even may be not so useful for us .

At the trainings we also got information about QPR system which we can present at the university only for staff. But it was unknown for us how to add new users or how organize their activities in the portal.

The trainer Inga Petrikiene 's trainings and workshop was attracted the audience. Because she introduced really interesting methods in contrast, Alvidas Punis which may be very useful for applying student oriented learning during the learning process. Good methodologies are available for improving pedagogy; however, they have rarely been applied systematically. Inga Petrikiene 's practical assignment helped us to get knowledge about how the teachers can evaluate the students skills on learning outcomes of any subject. Then she demonstrated effective way for us to use fishbone diagram in teaching process in her next presentation. We can also get information about 8 main principles of Total Quality Management.
