<p>The system of quality assurance system in Lithuania in general and MRU university in particular. All processes involved in QA at MRU. Roles and responsibilities different stakeholders in Quality Assurance. The overall knowledge to establish QA centres and some bottlenecks we will face in QA process. Requirements for study programmes in terms of quality assurance. Training programmes for enhancement of competence of teaching staffs. General structure of QA at MRU. Official documents for the implementation quality assurance and standardise them.</p>	<p>Azerbaijan Technological University, Different Faculties and departments. For All structures of the university it is applicable.</p>	<p>It would be more useful to go further into details of criteria for study programmes. Interactivity should be increased. Methods of increasing awareness about quality assurance policy in MRU. Overall organisation of training program is very satisfied.</p>	<p>Training should be more practical with handouts, case studies and group work. Different aspects of other universities should be touched. Problems during implementation of quality assurance policy should be stressed out. Comparative analysis of Azerbaijan and Lithuania would be very effective to capture the whole picture.</p>

How to create structures and departments and stress out their responsibilities and roles and additionally mark owners of the procedures. How to use QPR software more efficiently and some features of that program. How to share folders or files through server system and let the server see file or folder.	In QPR software. In Azerbaijan Technological University departures and structures are properly available to apply above mentioned features.	None	It would be better to show all other features and their appliance. Additionally to study on study cases.
