<p>We've learned various kind of feedback methods which include students, teaching staff and etc.</p> <p>We can use online system to get feedbacks from students and staff and analyse the result of the surveys and questionnaire</p> <p>We learned in which period we have to do it.</p>		<p>Honestly we do surveys between student but not online. But we think to do it online will be more fruitful to achieve our main goals and to eliminate our problems and drawbacks.</p>
