

Reflection of Azerbaijan Technological University (UTECA)

Title: Study visit of UTECA's Erasmus+ EQAC project team to the SMK

City, country: Vilnius, Lithuania

Type of visit: Study visit

Dates of visit: November 18-22, 2019

Group reporter: Asiman Ilyasov

Training Output:

We have participated at the training at SMK(University of applied social sciences) University with Orkhan Vatanxah, who is the Director of International Relations and Science Centre. We have developed our QPR Model with the help of Graphic Design and Metris, and additionally, integrated it with QPR portal. Moreover, we have learned about portal and how to add other users to the portal. However, could not get more information about portal and did not obtained detailed information about how to add new users to the portal and add authority or restrictions for them, how to direct them or organize their activities in the portal.

Evaluation of Agenda:

Agenda was fine and covered topics about QMS well. However, in some days QMS system was discussed, on the other days QPR Portal, and that is why, it can be said that this made confusion about topics.

Evaluation of Trainers:

Trainers were well-skilled and better, especially, Inga, Laura and Alvidas. Laura and Alvidas were organized trainings and workshops well as always. Inga did examination which showed us how to implement this method in our Universities. Examination was about implementing student centered teaching and assessment system in classes.

Evaluation of Management

Our coordinator university organized this training well as always. Flights and hotel were comfortable, and additionally, not far from the SMK university.
